International Business Management

Skills and experiences

Markup:

HTML5, CSS3, Bootstrap, MaterializeCSS.

Programming Languages:

JavaScript, Node.JS, PHP, Ruby.

Frameworks:

Express.JS, Angular.JS, JQuery, Codeigniter, Rails.

Databases:

MySql, MongoDB.

Projects

<http://squaddapp.com/>

I participated in Tackle Impossible Hackathon sponsored by Budweiser. To represent our product I created this landing page to collect customers' data and manage it.

This website is built with Node.js, Express, MongoDB, and Jade. It has a customer sign up form, contact us form, and an admin panel on the background.

<http://hueme.ca/>

This is my final project for Fanshawe college web development program. It's is a lightweight social network that asks it's members how was their day, and let's them share their experiences. It is built with PHP, Codeigniter, AngularJS, and MySql.

Experience

QA/Support Engineer, Caspio Inc., Ukraine — January 2014 - August 2014
